**Subject:** RE: Briefing materials for Rolling Knolls call next week

Thanks, Betsy – I just got rid of the soil impacts limited in extent language. The bullet now reads:

- The RI found that the solid waste present throughout the site is not uniformly comingled with CERCLA contamination.

Suggested revisions –

Slide 2 – indicate the percentage of the site property held by DOI – less than 20% (as Chris Lyon said it's the tail wagging the dog)

Slide 7 – "soil impacts are limited in extent" is there a better way to say this? If you look at Fig. 5-2 from the draft FS (attached) the PRG exceedances are depicted in red.

I don't see the need for a fact sheet, but we could dust off an older one and send it as background.

This is what I had put together. Do you think we need an updated fact sheet too? I feel like they've all heard the story already.

ORC has already reviewed this. Copying Angela, she's already seen it too.

Please let me know if you have any comments, or think it's good to share.

Thanks

Hi Chloe, Stephanie put together something that we might be using.

FYI - I reserved 1836B for anyone who is in the office for the call.

**Subject:** Briefing materials for Rolling Knolls call next week

Hey Betsy, I was on the phone with Doug Ammon from HQ today and he asked if there would be any briefing materials for the Rolling Knolls call next week. I said I'd check. Could you let me know? Thanks!
